VEHICLE ALLOWANCES

Allowances are factors influencing the value of the loss vehicle when compared to a typical vehicle. The typical vehicle is a vehicle of the same year, make, and model as the loss vehicle, including average mileage, and all standard and predominant equipment. These allowances are displayed for illustrative purposes only.

The Base Vehicle Value is calculated from the comparable vehicles with adjustments to reflect the loss vehicle configuration.

VEHICLE CONDITION

Travelers uses condition inspection guidelines to rate the condition of key components of the loss vehicle on a three-point scale. A rating of average condition results in a valuation of that component that is consistent with typical vehicles for that year, make and model of vehicle. If a component is rated in exceptional condition, then a positive monetary adjustment is made to reflect the impact of that condition level on the value of the loss vehicle. Similarly, if a component is rated in below average condition, then a negative monetary adjustment is made to reflect the impact of that condition level on the value of the loss vehicle. Inspection Notes, if any, reflect additional observations from the appraiser regarding the loss vehicle's condition. Monetary adjustments are based upon market research consisting of data gathered from dealerships in California.

NHTSA VEHICLE RECALL

The National Highway Traffic Safety Administration has issued 2 safety related recall notices that may apply to the above valued vehicle.

NHTSA ID: 13V143000

ISSUED:

NO. OF VEHICLES: 204,169

Power train:Automatic Transmission Honda is recalling certain model year 2012-2013 CR-V, Odyssey, and model year 2013 Acura rdx Vehicles. During sub-freezing temperatures, the brake-shift interlock blocking mechanism may become slow and allow the gear selector to be moved from the Park position without pressing the brake pedal. As such, these Vehicles fail to conform to the requirements of Federal motor Vehicle safety standard 114, "theft Protection and rollaway prevention." if the gear selector is moved from the Park position without pressing the brake pedal it can allow the Vehicle to roll away, increasing the risk of a crash. Honda will notify owners and instruct them to take their Vehicle to a Honda or Acura Dealer. The Dealer will install an updated brake shift interlock blocking mechanism free of charge. The recall is expected to begin may 13, 2013. Owners may contact Honda at 1-800-999-1009. Honda's campaign recall numbers are S96, S97, and S98.

NHTSA ID: 12V338000

ISSUED:

NO. OF VEHICLES: 172,837

Latches/locks/linkages:Doors:Latch Honda is recalling certain model year 2012 Honda CR-V and model year 2013 Acura ilx Vehicles. If the manual or power door lock is activated while an interior front door handle is being operated by an occupant, the cable connecting the interior door handle to the door latch mechanism may become loose and move out of position. There is a possibility that the cable can move far enough out of position to prevent the door from properly latching. If the door is not fully latched, the door may open while driving or in a crash, increasing the risk of personal injury to the Vehicle occupants. Honda will notify owners, and Dealers will replace the front door latch assemblies in the affected Vehicles, free of charge. Additionally, the interior front door handles in certain Honda CR-VS will also be replaced, free of charge. The safety recall is expected to begin on, or about, August 16, 2012. Owners may contact Honda Customer service at 1-800-999-1009.

VALUATION METHODOLOGY

Travelers has provided CCC the VIN (Vehicle Identification Number) of the loss vehicle and the vehicle owner's zip code, which determine the market(s) that CCC used in the valuation. Using this information, CCC searches its databases to find comparable vehicles in these markets. CCC's database includes dealer and private party advertised vehicle information from numerous resources including AutoTrader.com[®]. Travelers has also provided CCC with the configuration of the loss vehicle, including equipment, odometer, condition, maintenance, etc. CCC also obtains vehicle sales prices from a database of California Department of Motor Vehicles vehicle registration sold transactions. Vehicles located are compared to the loss vehicle, and adjustments are made for differences such as model/trim, equipment, and odometer. Using the adjusted values of the comparable vehicles, CCC calculates the Base Vehicle Value.

The Adjusted Vehicle Value is determined by adjusting the Base Vehicle Value to account for the actual condition of the loss vehicle and its other reported attributes, if any, such as refurbishments, after factory equipment, and unrelated prior damage.

Please review the information in this Valuation Detail to confirm the reported mileage, condition and to verify there are no missed options, added equipment or refurbishments, or other aspects of the loss vehicle that may impact the value.

VALUATION NOTES

The following information was provided after the valuation was completed:

02/04 18:16 Extended Condition Adjustments changed after valuation.

Regulations concerning vehicle value include California Code of Regulations 10 CA ADC 2695.
